To the READER.

Reader,

HE feveral TABLES that have been calculated of this kind (tho' very imperfect) have met with a general Acceptation, and we are no less affured of a kind reception (from all traders especially) of these following, being more compleat than any yet extant, and more care hath been taken than usual to have them very Correct, for as other TABLES begin at one Farthing and so on by the Addition of one Farthing until you come to one Shilling, and from one Shilling to Ten, by the Addition of one Penny, and from Ten Shillings by the Addition of Six Pence until you come to one Pound: we have in our TA-BLES not only begun with one Farthing, and continued down fo to one Shilling, but we have from one Shilling to Ten continued our T A-BLES down by the Addition of an half-peny, which is more than any others have done; and from Ten Shilling to one Pound, by fix pence. We have at the Foot of each Table fet down the Great Hundred, viz. 1121 which most heavy Goods are bought by; also the Gross, viz. 12 Dozen, which Gloves Buttons, &c. are us'd to be bought by; also the Weigh of Cheese and Salt, &c. which is 256 as is usually Sold; you have also the Days of the Year, by which you may know your Expences or Wages, and the Feet in a Solid Rod of Brick Wall, being 272.

These are things of General use to be known by Trades-men of all forts, that will render this

Book more compleat than any of this kind.

The

The Use of the TABLE.

Example. If 1 Yard of Tape cost 5 Farthings, or 1 Penny Farthing, what will 46 cost? turn to the Table of 5 Farthings, and on the top of the Column under N. you will find 46, against which you shall find 45.9 d. 29. or if you will know what 46 Ells comes to, or 46 Yards of any thing, or 46 Pints, or 46 Ounces, so likewise 46 Pound at 5 Farthings the Pound comes to the, same Sum, viz. 45.9 d. 29, or 46 Gross at 5 Farthings the Gross, comes to the same 45.9 d. 29. so also 46 Days in the Year, at 5 Farthings the Day comes to 45.9 d. 29.

Example 2. I would know what 112 Pound of Tobacco dust will come to at 6d. a Pound? look on the top for 6d. and you will find the Great Hundred at the bottom 1121 2 16 0, and the Gross which is 144131 12. od. The Weigh 2561 61. 8s. od. The Days in the Year which is 3651 91. 2s. 6d. Feet in a Rod which is 272 61. 16s. od. and so much each comes to.

A General Rule to know if the Numbers in this Book are truly Printed.

Example. Suppose this Question: At 7 Farthings the Pound, what will 97 Pound cost?

The Answer by the T A B L E will be 14 Silllings 1 Penny 3 Farthings, and this is the true Resolution, I thus prove.
